To the Public

If your garbage cans are not in plain sight at the alley, and are not emptied, don't blame the garbage man. They must be kept in plain sight, so that he can see them without taking time to hunt them, and they must be in or near the alley. If you have complaints to make, see me.
 W. B. SALISBURY,
 Street Commissioner.

The Reputation of the Maxwell

"WHAT is the bore and stroke of your motor," was asked a Maxwell owner not long ago.

"I don't know," he replied simply, "I don't buy cars on figures any more. I buy them on what they've done."

For this man, and for many others like him, it was enough that during the thirteen strenuous years the Maxwell record for performance, reliability and economy had swept it to the front.

Figures—engine speed figures, horse-power figures, wheel-base figures—they meant nothing to him. The name "Maxwell" carried more weight than all the technical description that could be offered.

Maxwell cars have achieved this great good will and this priceless position with the public only by their unequalled record of things done. What is said of an automobile in its specifications is one matter. What the car actually does in the hands of owners, year after year, is another matter.

The Maxwell car has won its position through sheer merit. It has set record after record in competition with cars of all prices and classes.

Everything considered, the Maxwell is the safe investment. It is a known, tried and proved product. It will serve you as it is serving and has served countless others.

Let us arrange for a demonstration today. You will be under no obligation. We want to give you a chance to convince yourself.
